

Global POWERPLAY in OPTICAL COATINGS and SOLUTIONS

Upcoming Events

Silicon Valley Space Week, October 17 - 20, 2023

The seventh annual Satellite Innovation and third annual MilSat Symposium have come together to provide Sponsors and Exhibitors unprecedented access to important satellite industry professionals. Silicon Valley Space Week features superb programs and high caliber speakers.

We have the pleasure of welcoming you at our booth. [Learn more](#)

W3+ Fair Jena, Germany, November 29 - 30, 2023

We would like to welcome you to the W3+ Fair in Jena, the leading cross-industry platform for high-tech innovations in optics, photonics, electronics and mechanics.

Materion Balzers Optics invites you to visit our booth [B11b]. Here you'll have the opportunity to discover unique solutions and explore a variety of applications for our state-of-the-art optical components. [Learn more](#)

Presentation at W3+ Fair Jena

Elmar Elbinger, Business Development Manager, will present the talk "Manufacturing of high performance optical filters for Multi- and Hyperspectral Imaging" at the [EPIC TechWatch](#) during the W3+ fair on Nov 30, at 10:50 am.

Anniversary & Team Event

25 years of Jena - time to celebrate!

The 25th anniversary was a wonderful opportunity to look back on the history and achievements of the site. Employees, their families and invited guests enjoyed a day of fun, music, food and games. The event also traced the development of the company from its beginnings to the present day. Stefan Jakobs, who still runs the business today, co-founded the Jena site in 1998. Starting with a small team of optical coating specialists, he has grown the site to 100 employees over the past 25 years. [More insights](#)

LieMudRun

Materion Balzers Optics successfully completed the annual LieMudRun obstacle course, which took place this month in Liechtenstein. The team comprised employees from both Balzers and Jena who tackled the challenges together, creating a great opportunity for improving teamwork and cohesion within the company.

New Datasheet

Mid-Wave Infrared Filters

Materion Balzers Optics is a leader in MWIR filters used for a wide variety of applications. We offer a number of narrowband filters for measurement of various gases and vapors by non-dispersive infrared spectroscopy. We also offer narrow and wideband filters used for measurement of temperature and flame detection. For MWIR cameras, a window can be coated with an antireflective coating on one face and a longpass filter on the other face.

Sales and Business Development News

Our Commercial Team is Growing

We are delighted to welcome Simon Gubser as our new Head of Product Management in Balzers. Simon has a long and successful history with Materion Balzers Optics, starting as an apprentice in Unaxis. He has more than a decade of expertise in UV-replicated optics for various markets, such as consumer electronics and industrial equipment. He also has experience in managing laser modules for 2D/3D sensing and semiconductors. Simon is a valuable addition to our team and we look forward to working with him.
