

First certification ISO 14001 - Congratulations Site Balzers!

Site Balzers has reached an additional milestone in its continuous further development.

With the first certification of the ISO 14001 environmental management system, we will focus our corporate activities in the future more strongly on further improving our environmental performance and making our products and services even safer. In addition to our internal improvement, this also serves the business success of our customers.....

New market segment brochure "Consumer" - available now

Consumer
Optical Solutions for
Mobile Devices

Optics Balzer introduces optical solutions for mobile devices.

Optical sensors have become ubiquitous in our everyday life. Today's mobile phones are packed with nearly a dozen optical sensors to measure, select and alter light for different purposes. Our optical components are made for the filtering, guidance, and selection of light for mobile sensing applications. The brochure provides a fascinating overview of the different application possibilities.

New Easy-to-clean Coatings from Optics Balzers

Mechanically resistant, solvent- and dirt-repellent coatings with transparency from UV to IR

In order to provide users the greatest possible safety, Optics Balzers offers two new hydrophobic TopFlex™ coatings. Both are chemically resistant to water, oil and grease. TopFlex™ A and TopFlex™ UV are easy to clean and dirt repellent. Both adhere extremely well to underlying anti-reflective coatings, mirrors or various filters...
