

Shaping the Century of the Photon

Upcoming Events

Automation, Taiwan – Dec 15-18, 2021

The show features products such as Industrial Automation, Robot Technology, Industrial Automation ICT and software, Hardware and Factory Equipment and Machine Tool & Machinery. [Learn More.](#)

BIOS/Photonics West – Jan 22-27, 2022

Find the best solutions, components, instruments, and system providers from around the world. Meet top suppliers, gain industry insights, and discover new possibilities. [Learn more.](#)

[More Events](#)

Precision Optical Filters for Broad Wavelengths From UV to Far IR

Spotlight on Partnerships

We are proud to be listed on OSA (Optical Society) Green Photonics Guide. The society for advancing optics and photonic worldwide and a leader of excellence, delivering high-quality scientific and technical information that is authoritative, accessible, and archived. [More Info.](#)

Medical Product Outsourcing is a global magazine dedicated to the growing trend of medical device outsource manufacturing. In-depth coverage includes comprehensive feature articles, industry news, trends, and other developments pertinent to the service provider-OEM relationship. [See Listing.](#)

EPIC is the world leading industry association that promotes the sustainable development of organizations working in the field of photonics in Europe. EPIC fosters a vibrant photonics ecosystem by maintaining a strong network and acting as a catalyst and facilitator for technological and commercial advancement. [Learn More.](#)

Product News

Alflex™ (UV, B-VIS, B-NIR)

The Alflex™ mirror family has proven itself many times over due to its hardness and durability. Depending on applications the Alflex™ mirrors are generally insensitive to polarization and angle of incidence over wide wavelength ranges.

All types of Alflex™ are equipped with protection layers.

Narrow Bandpass Methane CH₄ Filters

Our narrow band filters offer a high signal-to-noise ratio that enables identification of any gas with a signature in the IR spectrum. Filters with a center wavelength of 3330 nm are commonly used to

detect, quantify and image methane. [More info.](#)

Sales and Business Development News

Industry Solutions

We develop a close relationships with our clients, creating a better understanding of customer needs. This deep insight enables our engineering team to deliver powerful, customized, comprehensive solutions for a surprisingly large number of different market segments and applications. Our coated optical components enable photonics to work for industrial automation, analytical and measurement instruments, and countless other applications.

This animal, the husky, representing the Industry market segment because of his excellent sense of direction makes the husky a tireless and reliable helper. This reflects how we use our knowledge and experience in a variety of ways, surmounting even the toughest conditions to provide optically perfect customer solutions.
